

# Health Care Team Event/IPE Research Student Assent Form

---

**Project Title:** *“The Health Care Team Event: A view into the attitudes and mindset of high school students and Interprofessional Education (IPE)”*.

**Principal Investigator:** Dr. Susan Anderson

**Co-Investigator:** Brock Rops, MEd

We are doing a research study regarding student learning styles and prior knowledge of Interprofessional Education, also known as IEP. A research study is a way to learn more about people. If you decide that you want to be part of this study, you will be asked to complete an eighteen question survey lasting approximately five minutes.

Also, for those of you competing in SD HOSA’s Health Care Team Event, you will spend time with your team practicing for that event and also complete seven brief online IPE modules for education purposes.

Not everyone who takes part in this event will benefit. A benefit means that something good happens to you. Some benefits may include learning more about how you learn best, identifying your strengths in a team setting, and gaining knowledge with respect to Interprofessional Education (IPE).

When we are finished with this study we will write a report about what was learned. This report will not include your name or that you were in the study.

You do not have to be in this study if you do not want to be. If you decide to stop after we begin, that’s okay too. Your parents know about the study too.

If you choose to be part of this study South Dakota HOSA and The University of South Dakota Sanford School of Medicine thanks you for your willingness and time dedicated to doing so.

Please keep this document for your records.
